

Vattenfall Capital Markets Day 2005

Presentation by

Matts Ekman
CFO

27 September, 2005

1. Update on Vattenfall's financial targets, performance and steering model
 2. Energy risk management
 3. IFRS impact on Vattenfall
 4. Investments
 5. Funding
- *Appendices*

Financial Targets

Key Ratio / Objective	Target	Q2 2005	FY 2004
Return on Equity (RoE)	15 % (on visible equity after tax over a business cycle) 	15.8*	14.2
Return on Net Assets (RoNA, Excl. IAC)	11 % before tax (= 15 % RoE recalculated into the Groups RoNA requirement) 	15.2*	13.8
Pre-tax interest coverage	3.5 – 5 times 	5.3*	4.7
Credit Rating	Single A category rating 	Changed A2/A- Positive outlook	Unchanged A3/A- Stable outlook
Profit improvement in German operations	Cost savings of EUR 400-500 million annually from 2005	Programme completed	MEUR 519

* rolling 12-months value

Key Ratios (IFRS)

4

Key Ratios (in % unless otherwise stated)	Q2 2005	Q2 2004	LTM
RoNA (1)(2)	15.2		15.2
RoE (1)(2)	17.4		17.4
Operating margin (1)		15.8	14.9
Pre-tax profit margin (1)		13.8	12.7
Pre-tax interest coverage, times (1)		4.0	4.4
FFO/net debt (2)	35.7		35.7
FFO net interest coverage, times (2)		11.8	12.1
Equity/assets ratio		24.7	27.1
Net Gearing - Net debt/equity, times		0.85	0.77
Capitalisation - Net debt/net debt + equity		52.2	52.2

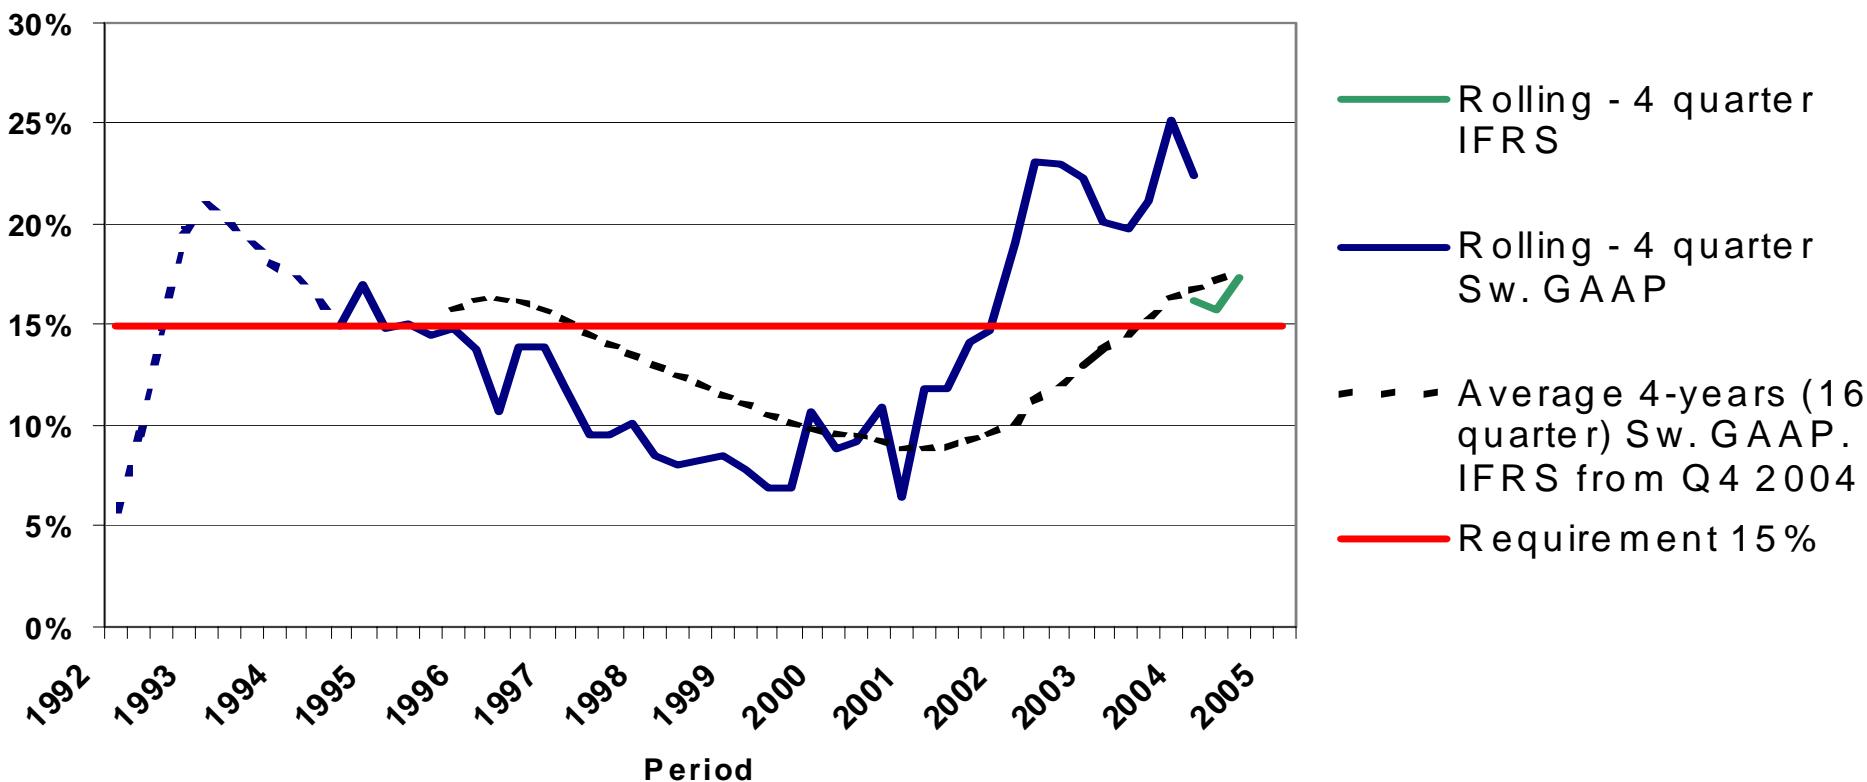

1) Excluding items affecting comparability

2) Q2 2005 value = LTM

Return on Equity

5

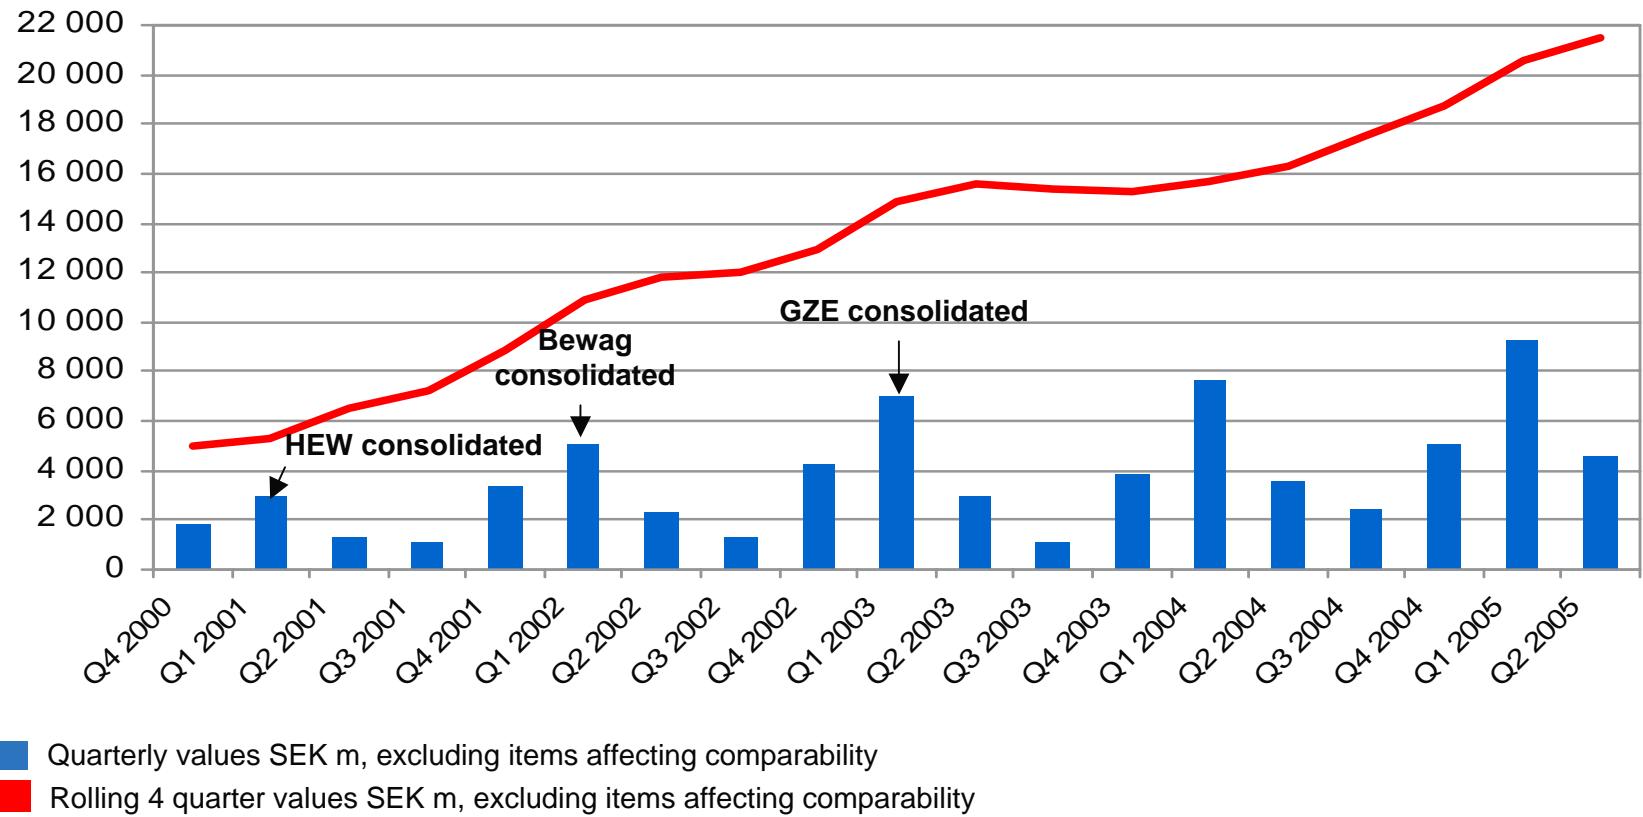

Group - Return on Equity Six months interim accounts - 2005

Continued Strong EBIT Development

6

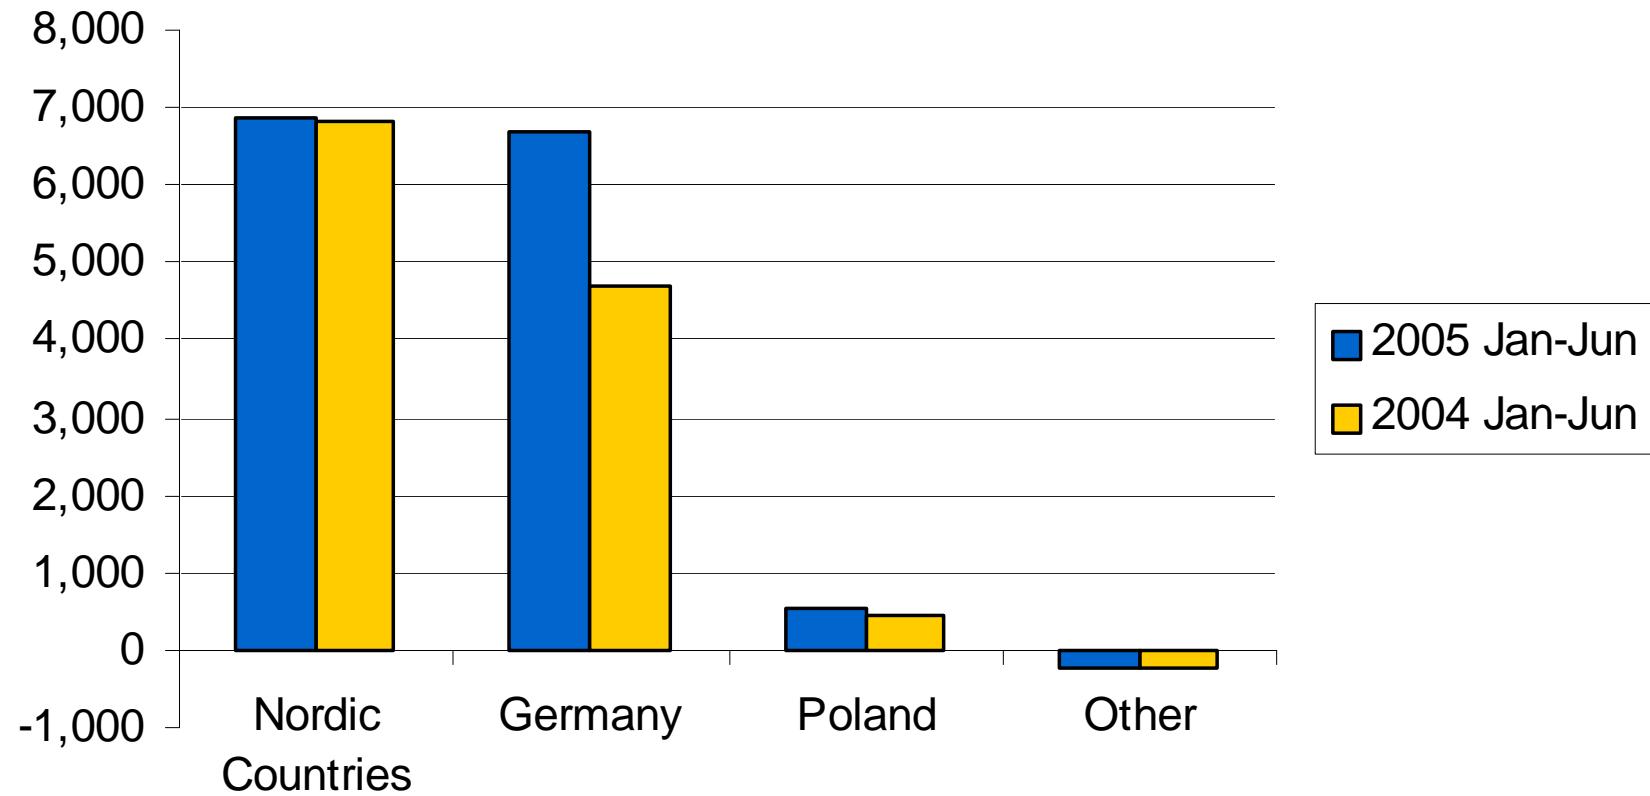

Quarterly values, SEK million

H1 – EBIT by Primary Segment

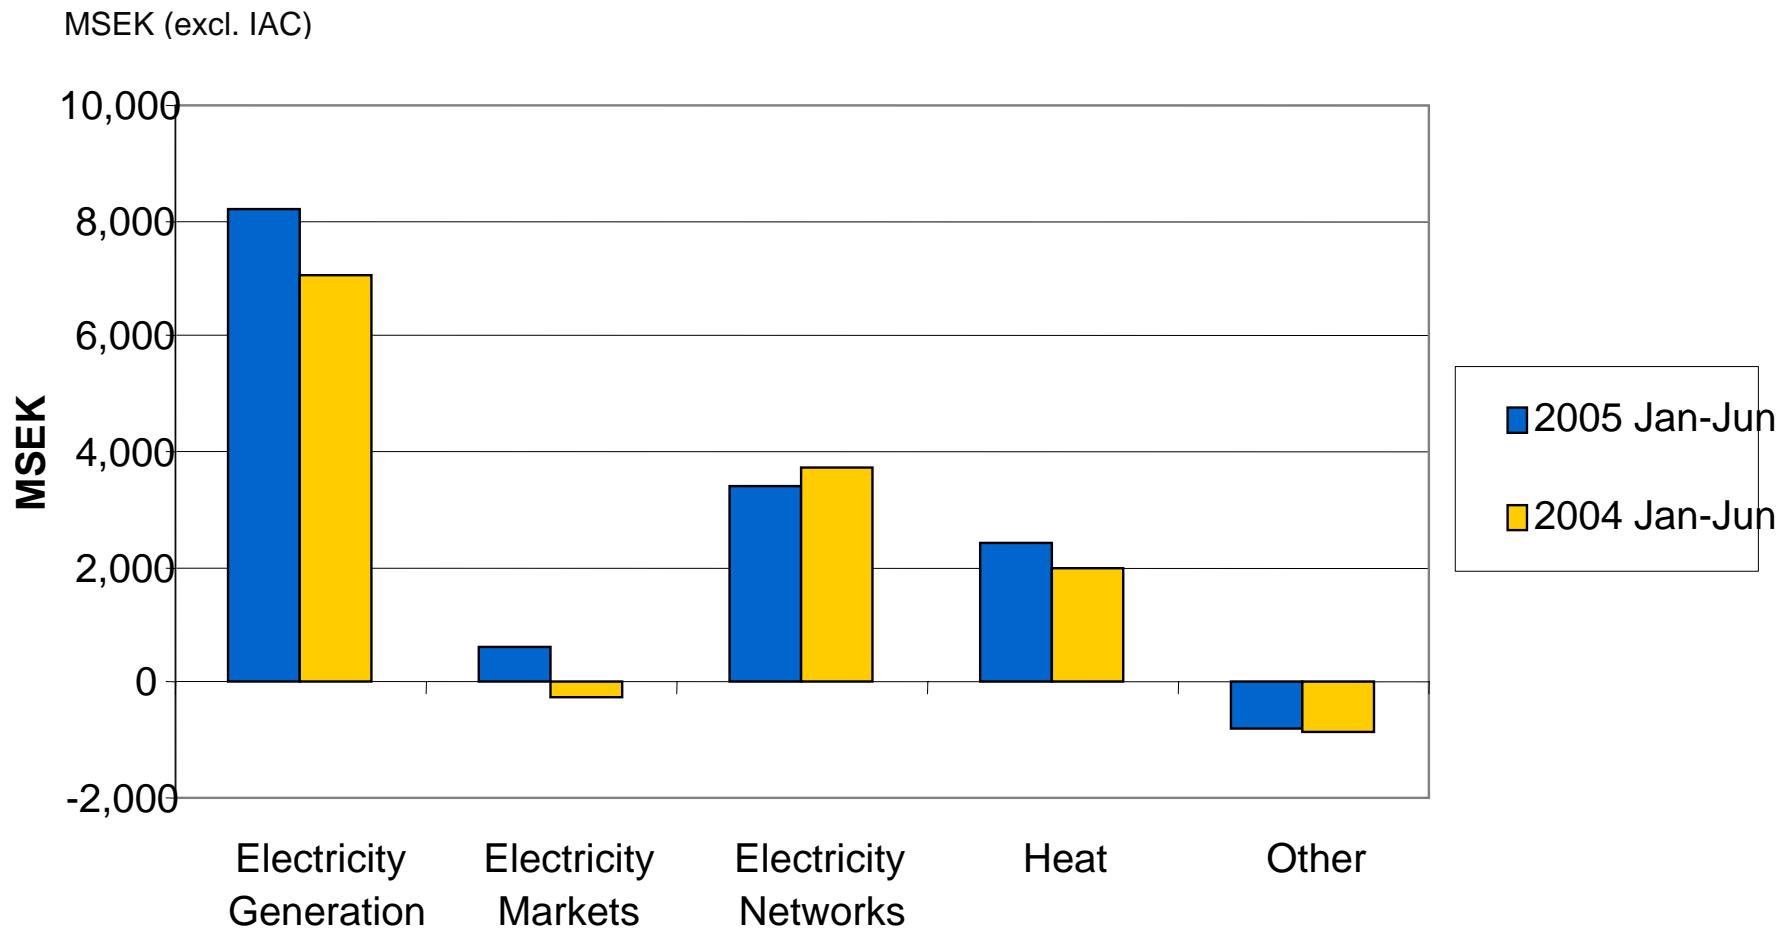

7

MSEK (excl. IAC)

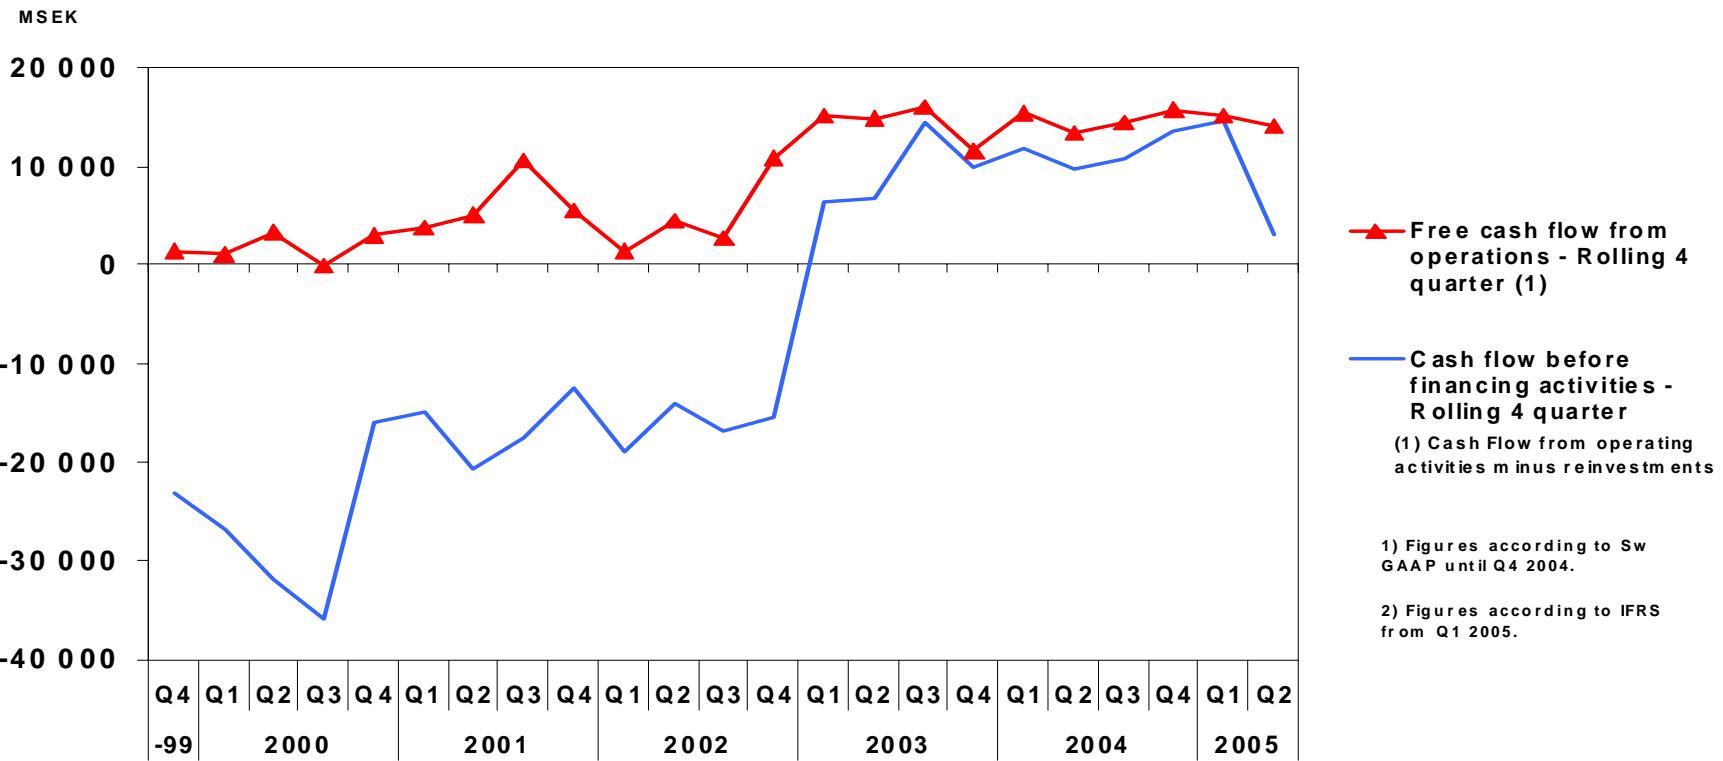

H1 – EBIT by Secondary Segment

8

Cash Flow Development

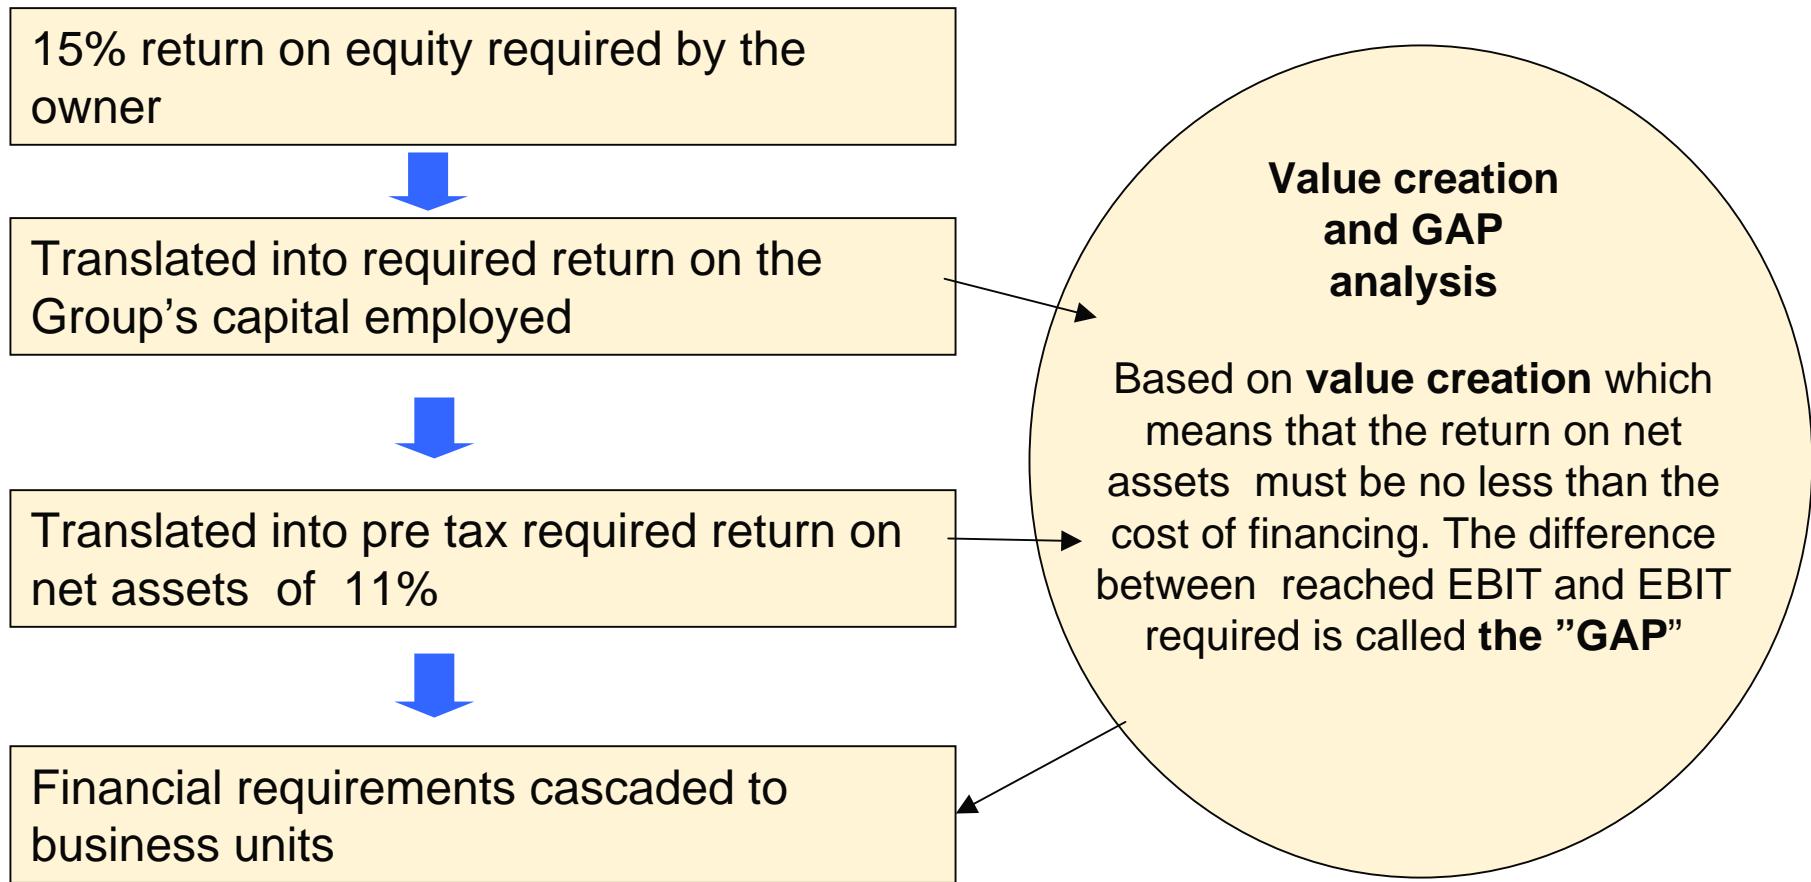

9

2. Vattenfall's steering model

Vattenfall's steering model

11

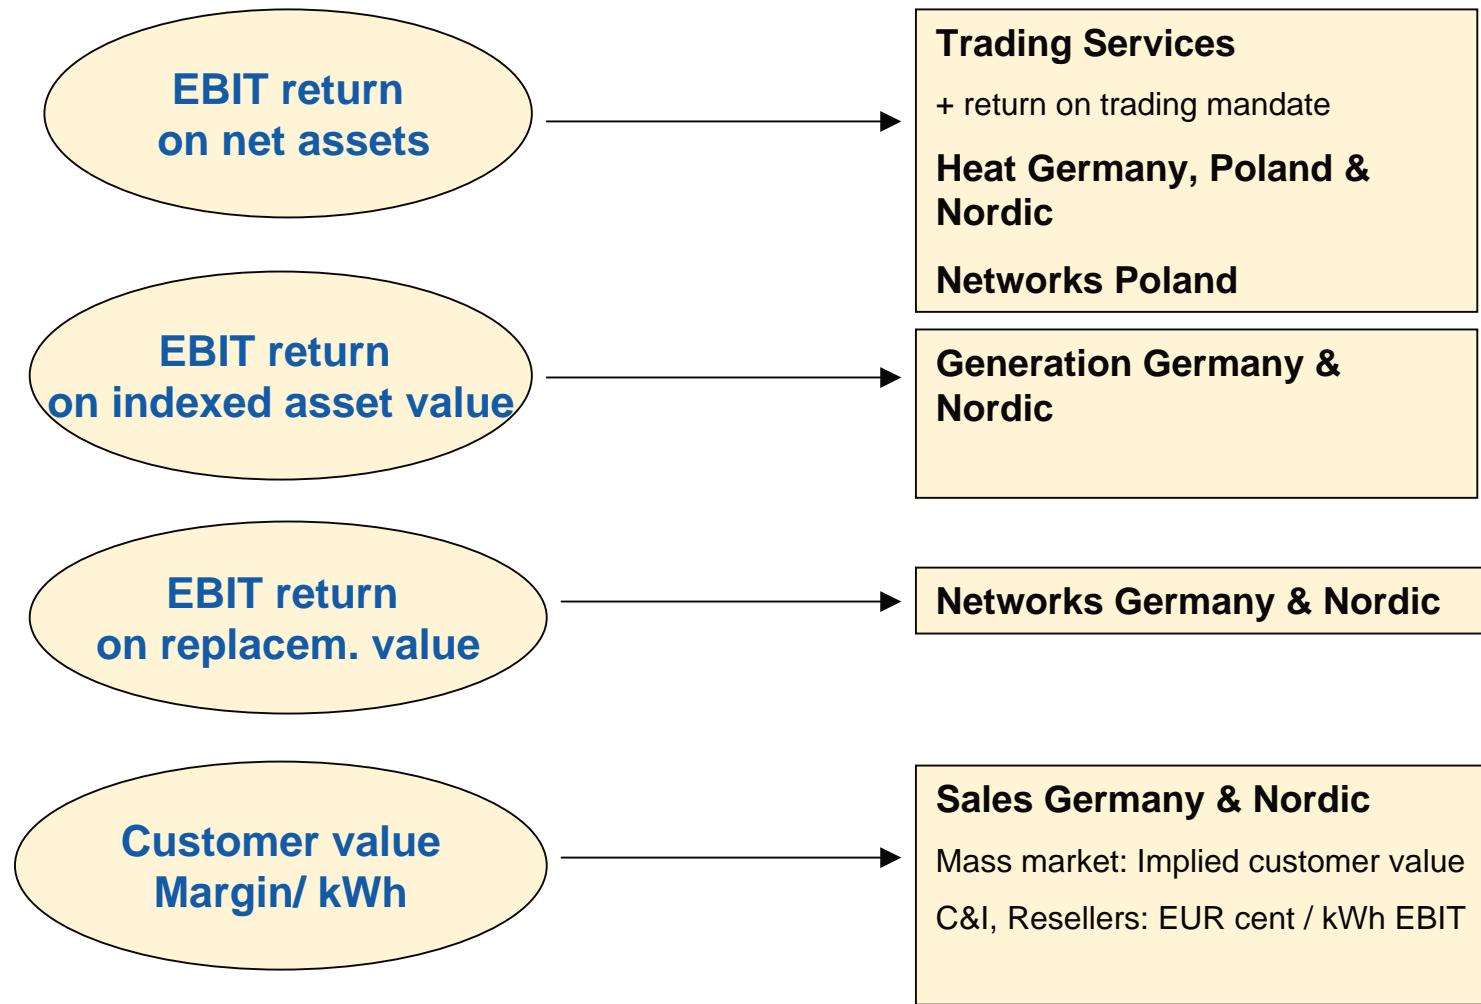

Value creation targets established for each BU

12

- The Group's net assets are defined as total balance sheet less cash and liquid assets and less non-interest bearing liabilities.
- Some units have "real" assets, mainly in generation and in the network business. For these units we calculate real required cash flow returns, and transform them into required earnings to match the total Group's requirement
- The various business units carry different risk. Therefore we differentiate the required returns between the BU's.

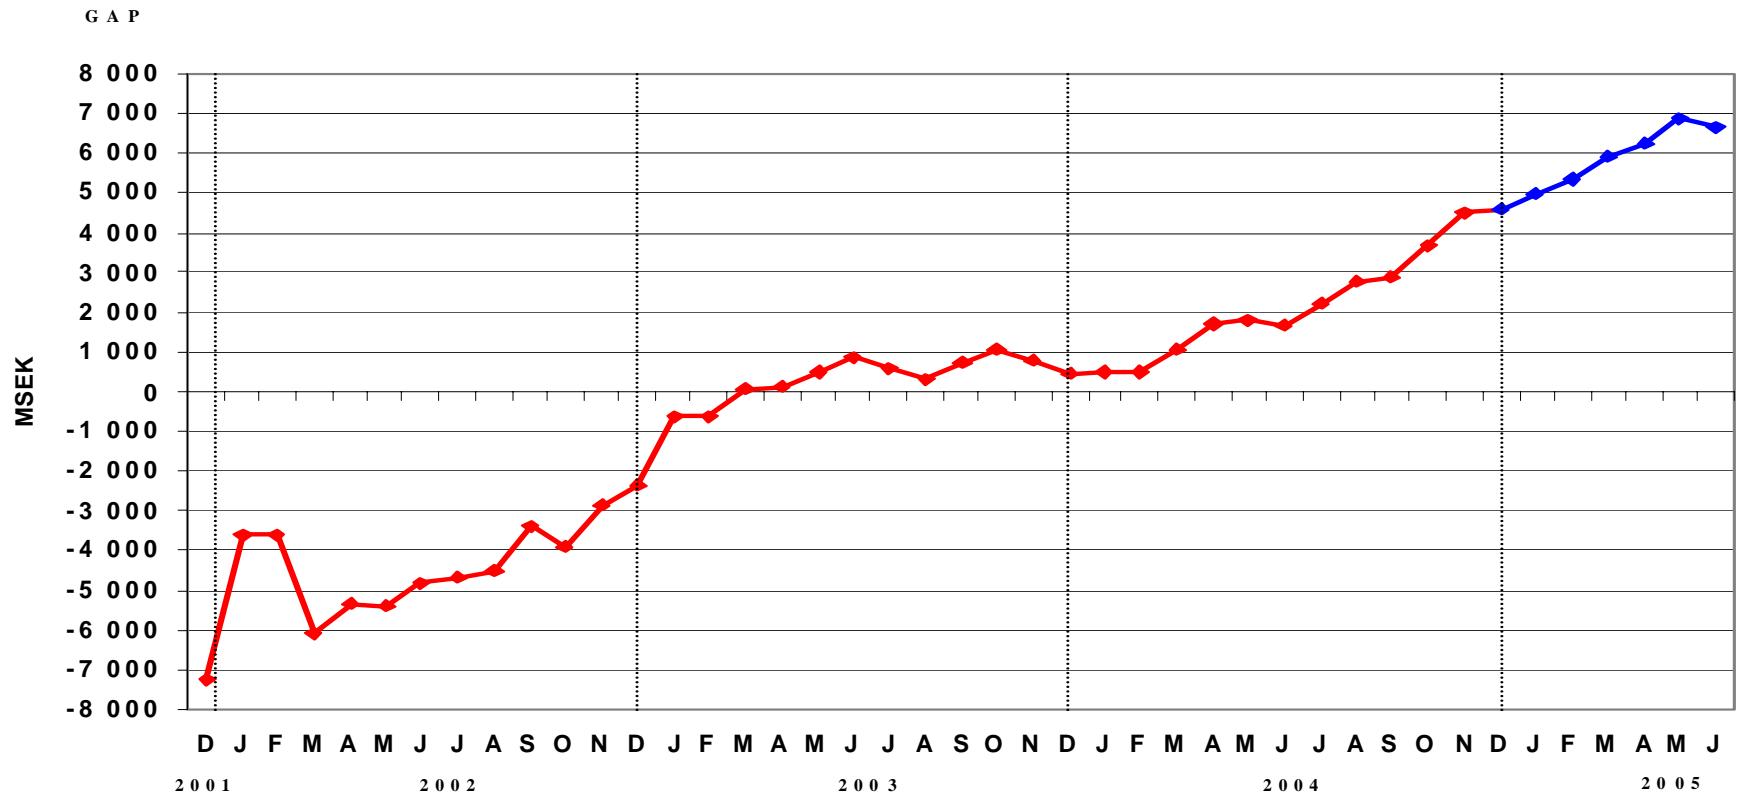

Financial requirements cascaded to business units ¹³

Value Creation

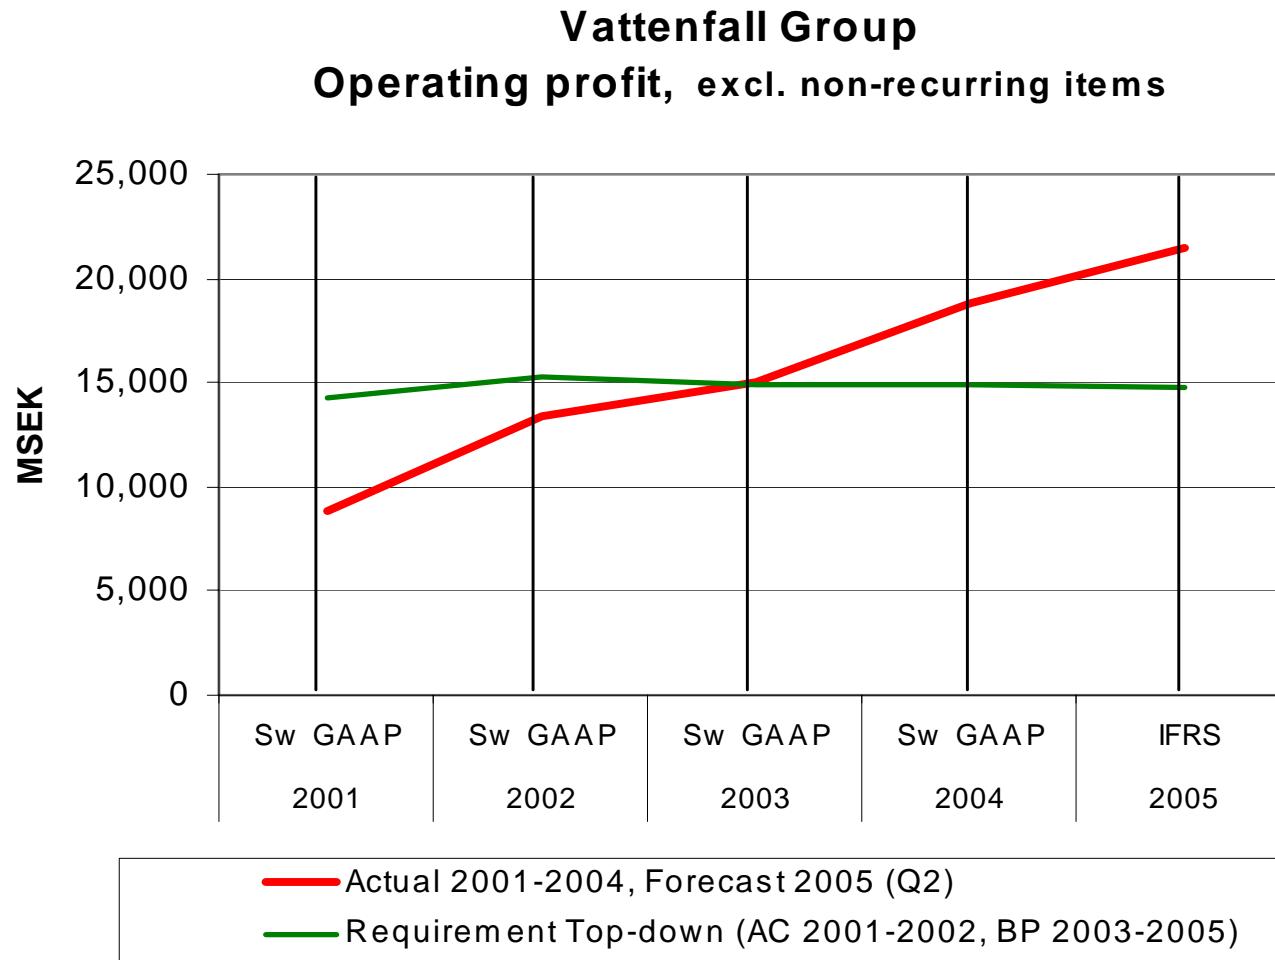

14

GAP-analysis (annualised) vs. long term requirement : 11% RoNA

GAP-analysis Vattenfall Group

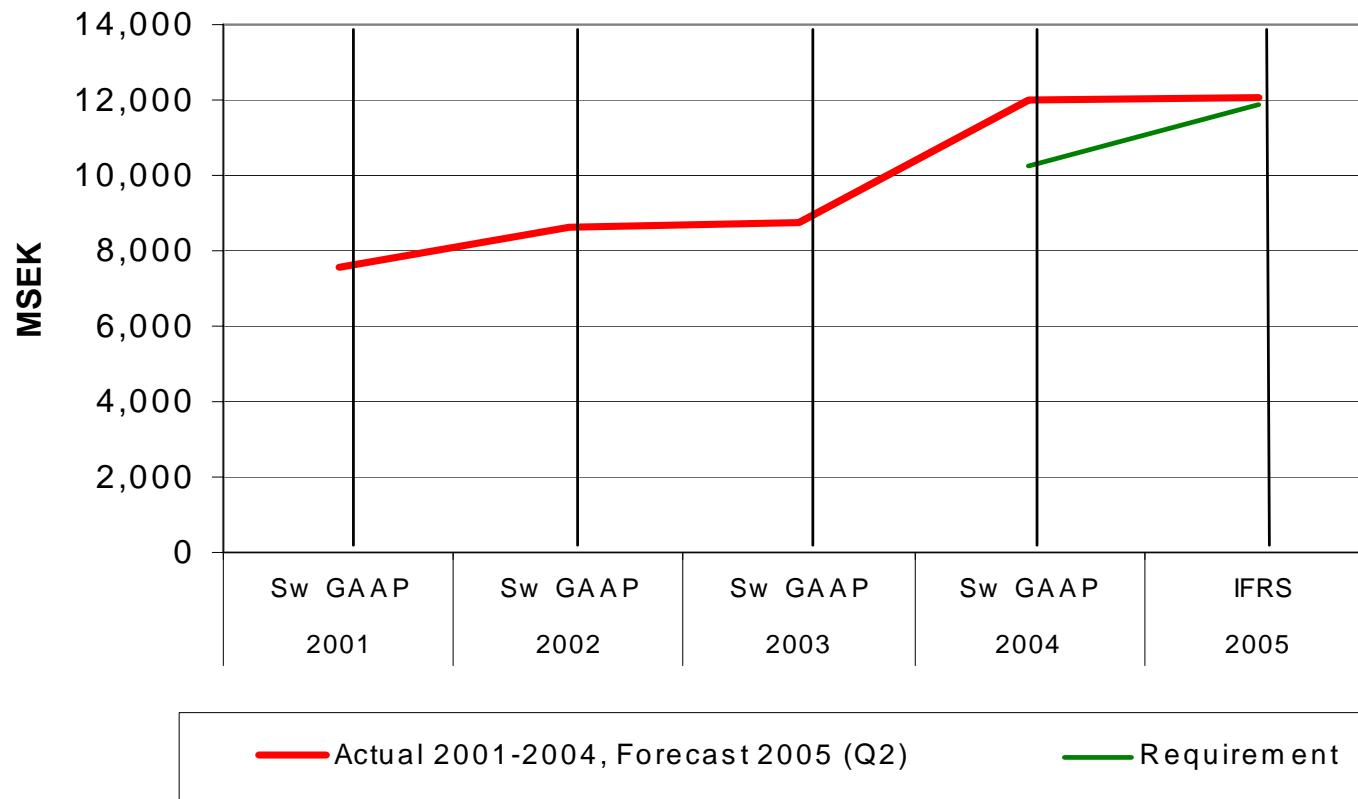

15

BG Nordic – Gap Analysis

16

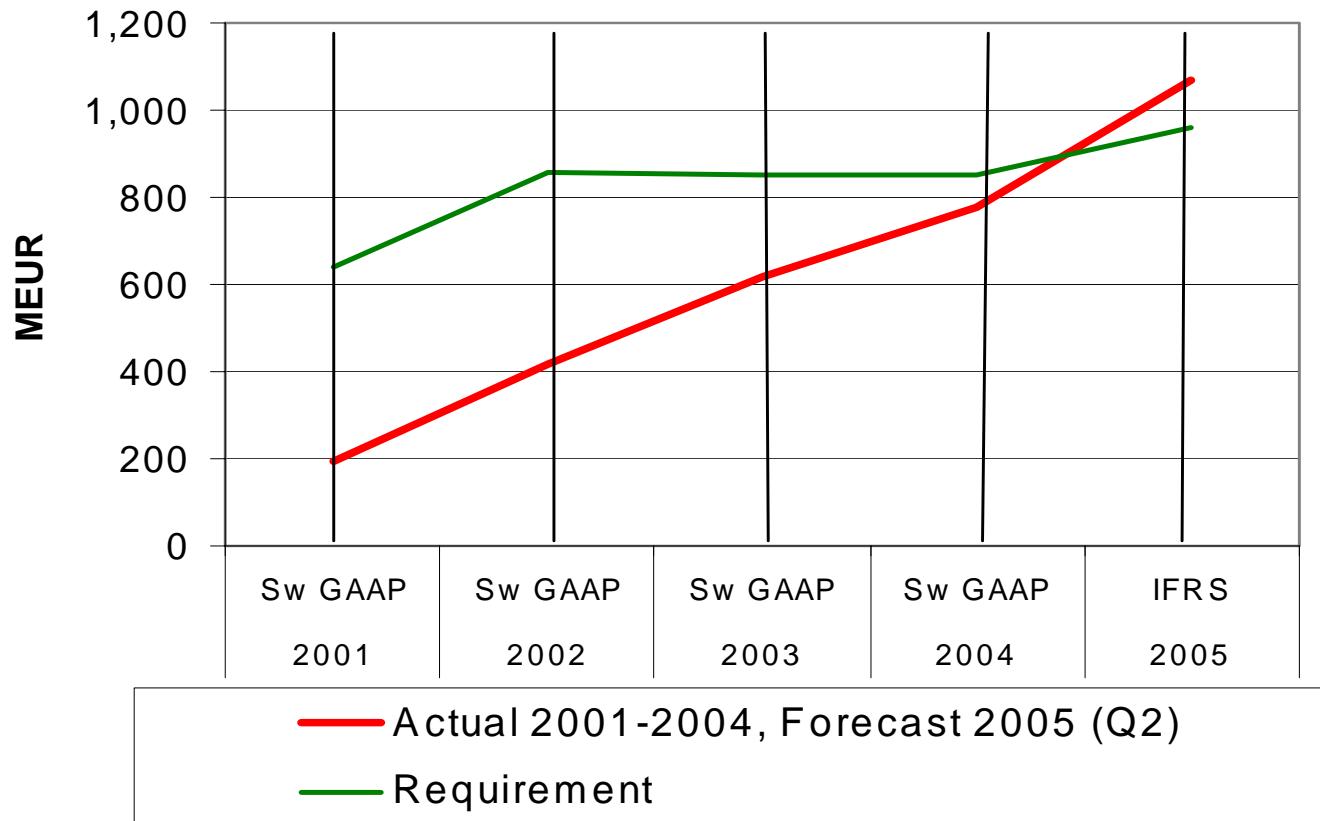

BG Nordic Operating profit, excl. non-recurring items

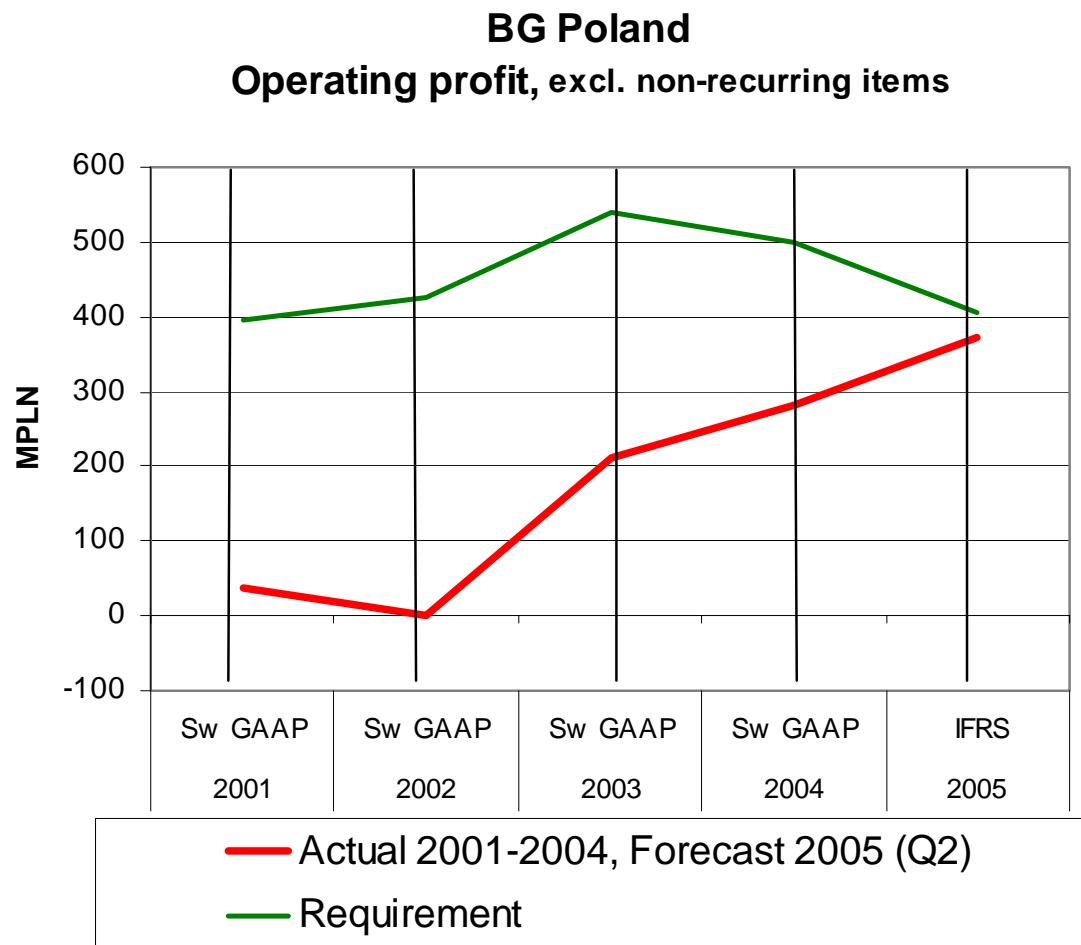

BG Germany – Gap Analysis

17

BG Vattenfall Europe Operating profit , excl non-recurring items

BG Poland – Gap Analysis

2. Energy risk management

Group control vs Business Units (BU:s)

- Vattenfall has a *centralised risk control function* combined with local risk controllers in the respective BU:s
- The allocated mandates are monitored and checked on a daily basis by the local risk controllers.
- The Group Risk Control monitors the aggregated mandate.
- There is a tree-structure of risk instructions (RI). One RI for each BU which clarifies and describes the risk management process and the reporting scheme
- The RI is a tool for the BU:s as well as for the risk management organization.

Risk Models

- “Value at Risk” and “Profit at Risk” are used together with stress tests and other simulation methods

Counter-party risk management

- Regulated by a separate Group Instruction

Vattenfall's CFO

- Receives the risk mandate from Vattenfalls CEO
- Defines and allocates risk mandates within the group
- Chairs VRC (Vattenfall Group Risk Committee)
- Approves counterparty exceptions

Vattenfall Group Risk
Committee
(VRC)

- Supports CFO in the risk management process

Energy & Commodity Risk Management

22

Energy & Commodities
Group Risk control

- Independent control function on a group level
- Responsible for risk control on an aggregated level. CFO's eye in the organisation.
- Reports to CFO and to Executive Group Management.

Local Risk Controllers

- Monitors the BU:s risks on a daily basis.
- Reports to Group Risk Control and to head of Business Unit (BU).

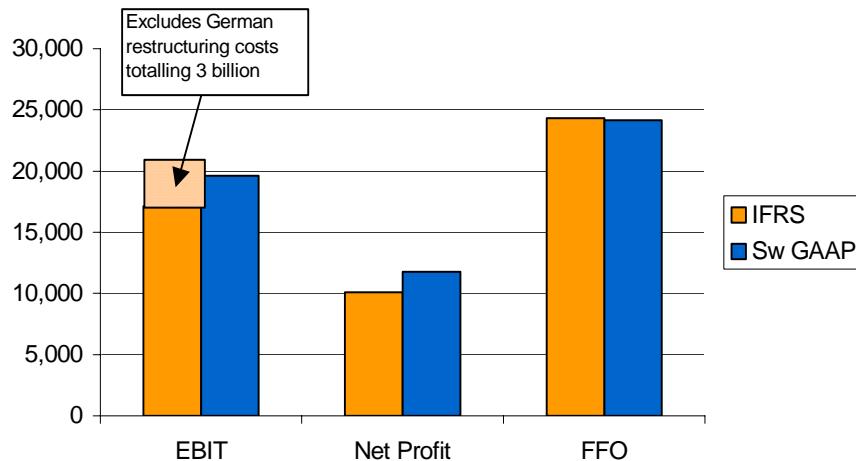

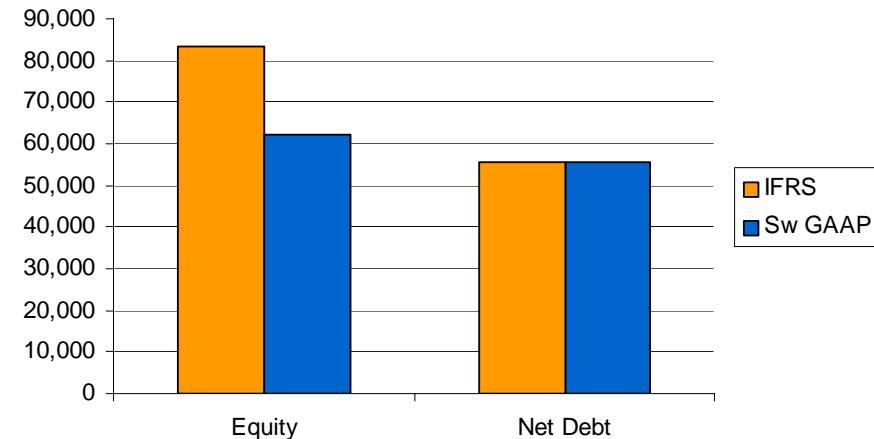

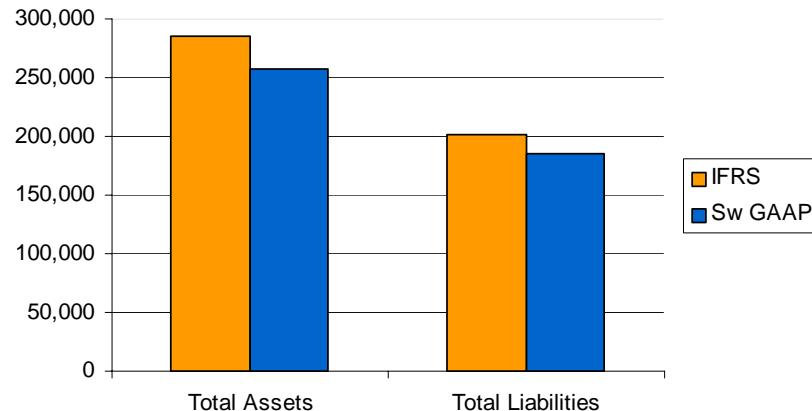

Business Units

- Responsible for active risk management.
- Determines the current utilisation within the delegated risk mandates.
- Assumes the financial consequences of the risks.

3. IFRS - Impact on Vattenfall

IFRS vs Sw GAAP FY 2004

24

All amounts in SEK millions

Hedging principles & the impact of IFRS/IAS 39

25

- Vattenfall hedges electricity generation in order to smooth earnings and cash flow
- Hedging horizon of three years
- Derivatives used to hedge future electricity production
 - cannot be fully netted according to IAS 39
- Given volatile electricity prices, long-term hedging has major impact on equity due to mark-to-market valuation of hedged position

Transition to IFRS – IAS 39

26

MSEK	Assets	Equity
FY 2004 According to IFRS	285,014	83,599
<i>Impact from adoption of IAS 39 per 1 January 2005</i>	6,998	-440
Opening balance 2005 adjusted for effect from adoption of IAS 39	292,012	83,159

Change in Equity H1 2005

27

SEK million

Balance brought forward from 1 January	83,599

Deviations compared with page 81 in Annual report due to the fact that deferred taxes are shown gross in this slide

Group Liquidity

39

Amounts in SEK million

<i>As of June 30, 2005</i>	Treasury	Germany	Poland	Others	Total	%
Cash and bank	630	957	354	3,689	5,630	38
Interest-bearing investments	5,162	1,145		145	6,452	43
Special Funds		2,860			2,860	19
Shares		11			11	0
Total	5,792	4,973	354	3,834	14,953	100

Unused committed credit facilities amount to SEK 17 760 million and other unused credit- and overdraft facilities amount to SEK 10 109 million.

Break Down of Group Debt

40

Amounts in SEK million

<i>As of June 30, 2005</i>	Treasury	Germany	Poland	Others	Total	%
Subordinated perpetual						
Capital Securities	9,268				9,268	11
Commercial papers	4,980				4,980	6
MTN	2,327				2,327	3
EMTN	41,587				41,587	47
Liabilities to assoc. companies		14,882		4	14,886	17
Liabilities to oth. shareholders		146		4,234	4,380	5
Bank loans and others	472	9,153	39	286	9,950	11
Total	58,634	24,181	39	4,524	87,378	100

Capital Securities – Key features

41

- Issue date: 29 June, 2005
- Size: 1,000 MEUR
- Coupon: 5.25%
- Maturity: Perpetual, callable in 2015
- Step-up 100 bps after 10 years
- Ranking: Junior subordinated
- Optional deferral: Yes, on a cumulative basis
- Mandatory deferral: Yes, interest coverage trigger, non-cumulative
- Equity credit 75% Moody's, 60% S&P

Capital Securities - Rationale

42

- Provides Vattenfall with increased financial flexibility in combination with lower overall weighted average cost of capital
- In line with our growth strategy
- Proceeds used to repay short term CP debt raised to fund the purchase of Elsam shares
- Principal amount treated as 100 % debt in Vattenfall's accounts
- Coupon treated as financial expense – not dividend

Vattenfall yield curve

43

Midbond vs Midswaps in Euribor terms
